

HIV Pre-Exposure Prophylaxis Screening Assessment Tool

- This is a voluntary self-assessment screening tool used to assess risk for acquiring HIV infection and is helpful to identify appropriate referrals for HIV prevention including Pre-Exposure Prophylaxis for HIV (PrEP).
- Once completed please share this with your health care provider (i.e. doctor or nurse) during your appointment.

Disclaimer: Our organization recognizes gender as diverse; however, the language of male, man, and female appear in this form for purpose of providing an accurate medical assessment.

Please CIRCLE your score for each answer		Risk Assessment
1. How old are you?	<18 years	0
	18-28 years	8
	29-40 years	5
	41-48 years	2
	49 years or more	0
2. Do you inject drugs?	Yes	
	No

	No	
11. Have you used HIV Post-Exposure prophylaxis more than once before?	Yes	
	No	
Overall Assessment:		

Please note: Evidence shows that a score of 10 or greater on this screening tool is associated with an increased risk of acquiring HIV. The BC Center for Excellence requires that patients have a score of 10 or higher to qualify for provincially funded (free) PrEP. If your score is less than 10, your risk of acquiring HIV is considered average or low.
